Hi Kurt,

Do you have any suggestions on how WildCare could send us 36MBs of files?

Bob

Hi Bob,

I received your voice mail message this afternoon. I can get pdf's of the lab reports to you easily enough but it's a big file at 36MB's. I'm open to suggestions about the best way to transfer that much data. Also, I fear they won't mean much to you without the core data and the charts. I'm happy to send them just the same but pulling and scanning that many charts will take some time and doing. We started testing more diligently in 2011 so I would prefer to send 2011 and later; we have those charts on site and some of them have already been scanned. Your thoughts?

We spent a good deal of our funds on those tests so we will ask that if the EPA uses it in print or to the media, etc., that it be attributed to WildCare. Our attorney worked up a usage blurb, I'll send that when I send the data.

I'm in late tomorrow so let's work it out via email. Thanks!

Kelle

Hi Kelle,

As you suggested in your phone message it might be best if we communicate by email because of the time difference. We would appreciate any, and all, lab reports that you are willing to share. In your phone message you mentioned patient records. We would appreciate having those, as well. Believe me, all this information will be examined closely.

If there is anything I can do for you just let me know.

Thanks,

Bob
